- Finance & Legal

Education Delivery

Education Delivery

Education Delivery is one of the most integral functions in a school that requires significant amount of resources in order to manage them well.

Following are the functions it covers:

- Academic Structure
- Timetable Generation & Management
- Lesson Management
- Online Homework/Assignments
- Examination and Evaluation
- Student Attendance

Education Delivery

Academic Structure

Defining the academic structure of the school at the start of the academic year or term is an integral function and one that requires **precise management**. Applane brings **tremendous ease and reliability** to the process as it allows the **administration and teachers to define and manage subjects in terms of chapters, manage the entire academic year with terms and allocation of sections.**

Lesson Management

Applane Lesson Management module gives teachers a **convenient and easy to use tool for managing their lessons better**, helping them **focus on the core activity**, which is delivering lessons. Applane allows teachers to **define lesson plan** for various subjects, **map the syllabus** with dates and **maintain the daily teachers diary** as well as **check note books.**

Education Delivery

Online Homework/Assignments

Managing homework online is not only an accepted modern practice for schools but is also preferred and appreciated by students and their parents as it brings **consistency** and **clarity in homework assignments** due to its **centralization benefits**. Applane allows the teachers to **define the homework, map the assignments** to subject, course, unit and chapter, **assign the homework**, as well as give a **student login** for downloading homework, assignment and project work.

Student Attendance

A key part of education delivery is Student Attendance management and the need for automating it is even more pronounced due to the amount of data handled on a daily basis for each school class. Applane **automates** this process with ease **giving tremendous control to the teachers and administration** and bringing **transparency to all students and parents** helping in the enforcement of **attendance discipline**.

Examination and Evaluation

The Applane Examination & Evaluation Suite takes care of most types of **examination patterns** and allows you the school to manage the following processes in a **seamless and automated way**.

- Manage exam schedule across terms and examination centres
- Define evaluation type and criteria for various subjects and courses
- Entering scores through the school website and consolidating Exam Results
- Generate CCE report cards and analysis reports as per CBSE Guidelines or as per the guidelines of your school regulatory body
- Allow students and parents to view the exam schedule and results through the school website

The CBSE CCE Module is an integral part of the Applane Examination & Evaluation Suite, an application specially designed and customized for Schools in India with special focus on CBSE schools. It is one of the most robust, scalable and user friendly solutions for implementing CBSE guidelines on CCE Report Card Generation in India.

Student Management

Student Management

The Applane Student Management suite allows a school to **automate the processes around student needs** from admission to their transportation while ensuring **seamless communication between the school, students and their parents**. It has been developed keeping in mind the need to bring in **efficiency in student management** while providing a **sense of security and safety in the minds of students and their parents or guardians**.

Following are the functions it covers:

- Admissions
- Student Information System
- Information Flow & Management (Student Portal, Parent Portal, General Reminders)
- Student Transportation

Student Management

Admissions

For a school, student admissions is the most important process at the start of an academic session and one that requires a very efficient and seamless operation. Applane brings in the much needed **clarity** and **reliability** to the process while helping in conducting it in a **fast** and **fair** manner.

Student Information System

Applane provides a completely integrated Student Information System that maintains a **comprehensive profile of the student** which acts as the core of Student Management. This enables all supporting student management processes to connect seamlessly with each other using this **fully automated, on-cloud solution**.

Student Management

Information Flow & Communication

A **seamless and timely information flow between the school, students and their parents/guardians** is not only an important function to keep **everyone updated on various school matters** but also a critical function to ensure **safety and compliance of the students as per school rules and regulations**. Using Applane, the school can communicate with students and their parents using **auto generated Email and SMS facility** on various matters .

Student Transportation

A key part of student management requires providing **safe and timely transportation to students** from their boarding station to the school and back. Applane provides a fully automated system for managing this crucial requirement for schools where they have to **manage the routes of hundreds of students** travelling on their school buses daily.

Student Management

Quick View – Parent Portal

The screenshot displays the Parent Portal Dashboard. At the top, a dark navigation bar contains a hamburger menu icon, the text "Parent Portal > Dashboard", and a user profile icon with the name "All". Below this, a sidebar menu is visible with a "Dashboard" header and a list of options: Communication, Guidelines For Parents, Complaint/Suggestions, Leave Request, Received Mail, Survey, Classwork, and Homework. The main content area is titled "Dashboard" and features a horizontal menu with the following items: "Payment Gateway" (highlighted with an orange underline), "Parent Mobile App", "Child's Profile", "Month Wise Attendance", and "More..".

Student Management

Quick View – Student Portal

The screenshot displays the 'Student Portal' dashboard. At the top, there is a navigation bar with a hamburger menu icon, the text 'Student Portal > Dashboard', and a user profile icon. Below this is a 'Dashboard' breadcrumb. A toolbar contains icons for filter, sort, refresh, and add. The main content area is divided into several sections:

- Student Profile:** A sidebar on the left containing fields for Image, Name, Enrollment No.*, Class*, Section*, Teacher, Email Id*, Mobile No., Emergency Contact..., and Address.
- Month Wise Attendance:** A large empty area on the right, likely for a calendar or attendance table.
- Status Wise Attendance:** A table header with a blank body.
- Leave Requests:** A table with columns: Request Date, From Date, To Date, and Status.
- Pending Fee Detail:** A table with columns: Invoice No., Due Date, and Pending Amount.
- Deposit Fee Detail:** A table with columns: Receipt No., Depos..., and Amount.

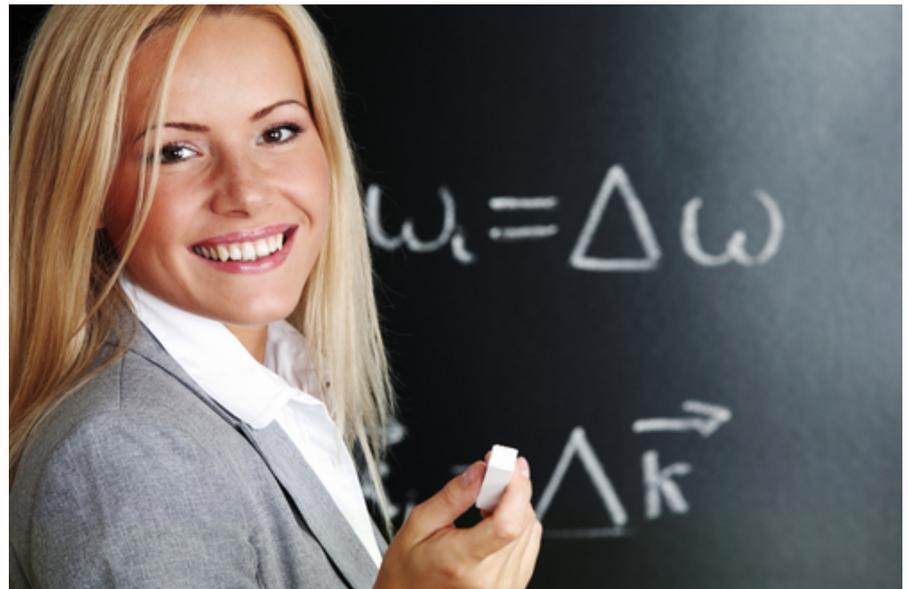

Human Resources

Human Resources

The teaching staff is the reason for a functioning school and the non-teaching staff is the support without which a school cannot operate smoothly. Ensuring a **motivated team by recognizing and planning their growth** is essential and Applane plays a key role in ensuring that. The Applane HR Suite for schools is an integrated system that allows the school to **manage all HR functions in a seamless way**, keeping the focus intact on **managing key HR challenges** such as employee performance and growth based on their skill sets, experience and their teaching and non-teaching contributions to the school.

Following are the functions it covers:

- Staff Information System
- Attendance & Leave Management
- Payroll Processing
- Performance Appraisal

Staff Information System

The Applane Staff Information system allows the school to **manage all the key details pertaining to teaching and non-teaching staff** at the school ensuring complete **transparency** in staff background and their potential in the school. The school can record key performance indicators of the staff and assign responsibilities to them accessible by the staff along with their profile, classes, entering scores, marking attendance, applying for leave through a login.

Attendance & Leave Management

The employee attendance system from Applane allows the school to automate key processes in managing and **controlling attendance related issues** of the staff, while bringing in **process consistency**.

Payroll Processing

Using Applane's popular payroll processing module, the school can process staff payroll with the click of a button, cutting down enormous amount of tedious documentation month on month and bringing in consistency and accuracy in salary calculation. The school can process payroll real time with generation of salary slips and statutory reports, reducing the number of queries and doubts.

Performance Appraisal

Using the Applane performance appraisal module, the school can measure employee performance using employee performance data and distinguish between performing and non-performing employees. It is now possible to conduct performance appraisal and issue appraisal letters automatically from the system.

General Administration

General Administration

It is important to **invest school funds into further development of the school** for the benefit of the students and improving learning systems. To achieve this, it become essential to **control costs pertaining to general administration** of the school without compromising on high standards. Applane helps in achieving this balance by automating key functions pertaining to general administration.

Following are the functions it covers:

- Library Management
- Alumni Management

General Administration

Library Management

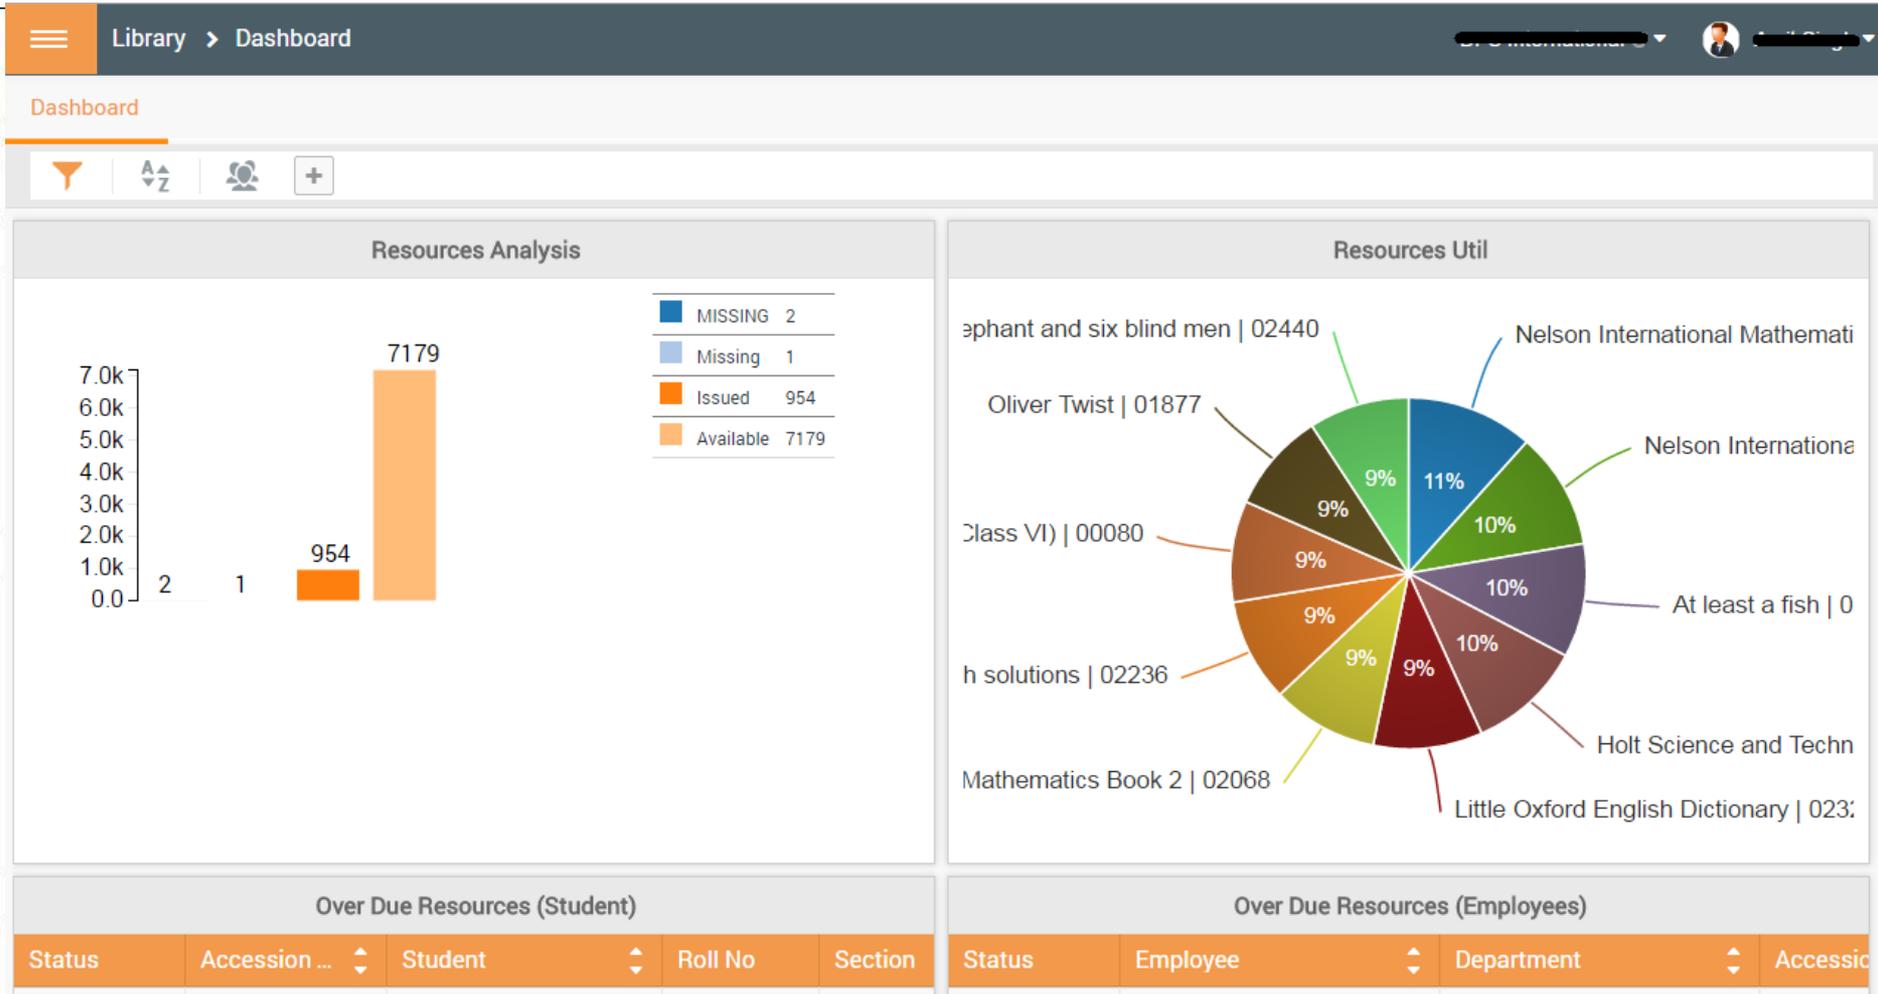

The library is the knowledge store of a school and becomes even more effective in imparting knowledge if managed properly. Applane brings automation to library management in a school allowing it to **manage departmental libraries** and inter-library transfers, **store resource details** including books, journals & multimedia resources for **easy retrieval** later and manage stock verification, **enable search and reservation of the resources online**, **manage serial and subscription management** including issue, return and reservations.

Alumni Management

The alumnus of a school can register on their school website and once approved they will receive any news, job or other event updates on the Alumni dashboard. They can also search for their batch mates or friends and also send them requests to join the alumni network.

Finance & Legal

Finance & Legal

With everything else under control, a school still needs to ensure that it keeps its **operational costs low and cash flow positive** while staying compliant to financial regulations. Applane also ensures that **your financial accounting processes are completely integrated with fee processing and vendor management**. This ensures that everyone within your organization is **aligned to financial objectives**, and can act responsibly.

Following are the functions it covers:

- Fee Processing
- Accounting
- Procurement

Fee Processing

Fee collection processing is a key monthly activity in a school and one that requires close control to ensure there are no lapses in financial management of the school. Applane ensures **fee processing automation** by **creation and management of fee types and fee periods**, helping in management of concessions, **enabling bank reconciliation**, sending auto SMS and e-mail alerts for **fee reminders, generating reports** such as fee register, **providing student login** at institution website for viewing fee paid and dues.

Accounting

Accounting encompasses managing accounts, automated bill generation; easy ledger entries and record vouchers. It also includes preparing P&L, Balance Sheets and Cash Flow statements and standard statutory reports quickly.

Procurement

Applane ensures the generation and sending of Purchase Orders, managing assets well, analysing expenses, integrating purchasing department with accounts as well as analysing vendors.
